PROFESSIONAL SUMMARY

Flutter Developer with hands-on experience delivering production-ready mobile applications using Dart, Flutter, REST APIs, Provider state management, and Firebase. Skilled in MVVM/MVC architecture, clean code, and Generative AI-assisted development workflows.

PROFESSIONAL EXPERIENCE

Flutter Developer, Portfolio Builders & Portfolix Tech 03/2026 – Present

- Developing scalable cross-platform mobile applications using Flutter and Dart following MVVM architecture principles.
- Implementing REST API integrations, reusable UI components, and Provider state management for production-ready applications.
- Collaborating with development teams to deliver responsive, high-performance applications with clean and maintainable code.
- Working with Firebase services, local storage solutions, and application optimization techniques to enhance user experience.

Flutter Developer (Intern), Techmindz 11/2025 – 01/2026

- Developed responsive mobile applications using Flutter, Firebase, REST APIs, and Provider state management.
- Assisted in debugging, testing, and improving application performance and UI responsiveness.
- Participated in feature implementation and collaborated with team members in agile development workflows.

Technical Consultant - ERP (Odoo), Oscilix 03/2025 – 07/2025

- Customized ERP modules and supported workflow automation processes using Odoo.
- Assisted in User Acceptance Testing (UAT), requirement analysis, and business process improvements.
- Worked closely with teams to streamline operational workflows and improve system efficiency.

EDUCATION

St. Thomas College of Engineering & Technology, APJ 2019 – 2023 | Kerala

Abdul Kalam Technological University,

B.Tech - Computer Science Engineering

- CGPA 7.23 (First Class)

CORE TECHNICAL SKILLS

(Flutter & Dart development • • Stateless and Stateful widgets • • Responsive UI design & Material Design • • Local storage (Shared Preferences) • • REST API integration with JSON parsing • • Firebase basics (Authentication & Firestore) • • MVC / MVVM architecture • • Java & C • • SQL • • Git & GitHub, Postman • • HTML, CSS)

CERTIFICATIONS

Flutter App Development Training - Luminar Technolab, Kochi (2024) |

NACTET Certification - Android & Flutter App Development |

Vocational HSS Skill Certificate - OOP, Databases, Web Development, Networking

PROJECTS

GTECH Education LMS – User & Admin Application, Flutter, Dart, Provider, REST API, JWT Auth

- Developed the complete user-side and admin-side Learning Management System (LMS) application for a popular EdTech platform using Flutter and Dart.
- Integrated REST APIs to enable seamless communication between user and admin modules for real-time course management, student progress tracking, authentication, and content synchronization.
- Implemented secure JWT-based authentication, responsive UI design, and scalable state management using Provider architecture.
- Built core LMS functionalities including course enrollment, video learning modules, dashboard analytics, notifications, user management, and content administration.
- Designed reusable and maintainable application architecture with optimized API handling and performance-focused development practices.

PortfolioBuilders Website & Learning Platform

- Developed the complete Portfolio Builders website featuring a free-course learning platform with multiple technical and career-focused courses.
- Built and integrated a mini LMS platform that enables users to access tutorial videos, assignments, and structured learning content through an interactive learning environment.
- Implemented a roadmap-based learning feature to guide users through step-by-step skill development paths and course progression.
- Developed core functionalities including course management, tutorial access, assignment tracking, authentication, dashboard navigation, and API integrations.
- Designed responsive web interfaces with reusable UI components while focusing on scalable architecture, clean UI design, and optimized performance.

E-Commerce Mobile Application, Flutter, Dart, Provider, Shared Preferences, REST API

- E-Commerce Mobile Application

Built a cross-platform e-commerce application featuring user authentication, product listing, cart management, and persistent login functionality.

- Integrated REST APIs for dynamic product management and real-time data synchronization.
- Designed reusable UI components and implemented state management for smooth application performance.

Note-Taking Application, Flutter, Dart, Hive

- Developed a cross-platform Notes Application using Flutter with note creation, editing, deletion, and search functionalities.
- Implemented local data storage using Hive and Shared Preferences with responsive UI and optimized performance.
